Coalition to March on the RNC 2024
Points of Unity

1. Fight the racist and reactionary agenda of the Republican Party.
2. Defend women's, LGBTQ, and reproductive rights.
3. Defend and expand immigrant rights.
4. Peace, justice, and equity for all.
5. Stand with Palestine.

The member organizations of the Coalition to March on the RNC 2024 unite on the above five points. We are using this march as a direct call to action against the racist and reactionary agenda of the Republican Party. Our organizations come from various movements: immigrant rights, reproductive rights, LGBTQ, labor, and many others. The Republicans have long attacked the rights of working people, particularly Black, Chicano, and other oppressed peoples. They have concrete plans to continue the erosion of our freedoms. Their agenda knows no bounds. Encouraging police to kill with impunity, vilifying immigrants, overcrowding prisons, appointing reckless judges, restricting reproductive rights, siding with corporations against workers and their unions at every turn, and accelerating the climate crisis are just some ways the Republicans have directly made American working people's quality of life worse. Our Coalition stands united. We are marching to let both the Republicans and the whole country know that their hateful, anti-people agenda will not be tolerated. We will organize and fight them every step of the way: here today, and in the months and years to come. All who believe in justice should join us in this struggle.

Press Conference Speakers Remarks

Kobi Guillory, Freedom Road Socialist Organization (FRSO) Central Committee Member

Good morning. My name is Kobi Guillory and I'm a middle school science teacher in Chicago and a member of Freedom Road Socialist Organization. I came up here to loudly and proudly oppose the racist and bigoted agenda of the Republican party.

For decades Republicans have been on a mission to deprive the majority of people in this country of their basic human rights. Their attacks on Black and brown people, on women, on

immigrants, on the LGBTQ community, and on the working class have destroyed the lives and livelihoods of millions of people. Defeating the Republican agenda is a matter of life and death for working and oppressed people.

We have to protect ourselves in this country and we have to stand in solidarity with oppressed people around the world. Our government is committing genocide in Palestine and reinforcing deadly militarism and fascism around the world. We live in the belly of the beast, the headquarters of the imperialist system. It is our responsibility to destroy this system so that people here and internationally can live their lives in peace, justice and equality.

That's why we're here protesting the RNC. That's why we'll be protesting the DNC in Chicago next month. This fight is bigger than the ballot box. It's bigger than any event. We're fighting against a class of exploiters and oppressors who have committed crimes against humanity for over 400 years.

We will continue to show up in the streets and say no more oppression. No more repression. No more exploitation. The only reason we're not on plantations right now is because of working and oppressed people who came together and fought for justice.

The power of the people is stronger than the people in power. It's the power of the people that makes history and changes the world, and that's exactly what we're going to do.

All power to the people!

Carlos Montes, Legalization For All (L4A)
The Legalization for All (L4A) Network is uniting to march on the Republican National Convention. Defending immigrant rights is among one of our key uniting factors.

Other uniting pillars of our network include: legalization for all; no racist border wall; no border militarization & no more deaths; stop the exploitation of undocumented workers; stop the deportations and separations of families; and stop the sterilizations and sexual violence against the undocumented.

Republican Texas Governor Greg Abbott continues on his unending mission to attack and destroy immigrant lives at the U.S./Mexico border. He continues to be supported by Trump and various other bigots on their quest to use every imaginable dollar to hurt and oppress asylum seekers. Trump has vowed to make one of main goals stifling immigration from specifically non-European origins. This is why L4A is marching on July 15th and also why we will do so in an immigrant rights contingent.

We are joining the march against the republican convention because Trump has vowed to increase his attacks on immigrants and asylum seekers. We learned about Trump's ability to push vigilante racists like the one who drove to Uvalde, Texas and shot and killed 23 people he perceived to be immigrants at a Walmart. I will be marching to protest Trump and the many Republicans for their continued treatment and terror of the undocumented.

Victoria Hinckley, Students for a Democratic Society (SDS)
This year we march on the RNC to stand against the attacks on women's and reproductive rights, Black and Chicano folks and LGBTQ folks that are pushed by the Republican Agenda. Since the overturning of *Roe v. Wade* in 2022, we have seen countless attacks on reproductive rights, with Students for a Democratic Society mobilizing against them each time.

The *Dobbs* decision was a direct result of Trump's presidency, in fact he takes pride in this. Women and students around the country have been suffering since the *Dobbs* decision and SDS is dedicated to fighting for abortion and reproductive rights, until it is readily available for every person in America. These attacks on reproductive freedom and abortion access are harshly felt in the South, especially in states like Florida and Texas with the emergence of anti-abortion bills banning abortion within the first few weeks of pregnancy. Bills like these are supported and introduced by Republicans across the country as we see copycat bills spread from state to state aiming to strip people of their bodily autonomy and right to decide their futures.

These policies that Republican officials enact worsen the livelihoods of women and queer folks. Lack of abortion access threatens people's lives, their health, and their financial stability. This makes it crucial for us to mobilize and protest against the reactionary agenda we see at the RNC. National Students for a Democratic Society demands safe, legalized and accessible abortion and reproductive freedom for all. We refuse to accept these continued attacks and we refuse to take another step back for reproductive rights.

Cody Urban, International League of Peoples Struggles (ILPS) U.S. Chapter Vice Chairperson
The 2024 Republican National Convention is here, and the most utterly fascist elements of the US ruling system are preparing to descend upon Milwaukee.

False promises of recovery and ultranationalist fervor are used to mask the intentions of both the Biden and former Trump regimes as the Presidential election approaches. In the midst of this ruling-class power struggle between the backers of both the Democrat and Republican candidates, the entire U.S. ruling system is exposed for its inherent inability to serve people's needs as an economic depression looms and previously held legal democratic rights are stripped.

Working and daily living conditions are becoming more destitute as energy, food and other basic prices rise, and more and more workers, including in the U.S. and internationally, are being pushed out of secure employment and many are forced into more precarious forms of work, are being pushed out of secure employment and many are forced into more precarious forms of work through contractualization, easily manipulated "flexible" work hours and worked deemed "criminal" by the state when no options are left.

Attacks on women and their right to reproductive healthcare are on the rise. LGBTQ folks are facing a wave of violence as repressive laws are passed to push them back into the shadows of decades past. Migrants and all people of color are met with xenophobia and racism that fuels waves of mass shootings across the country. The Republicans lead proudly with these policies at the forefront, while the Democrats pay lip service for campaign contributions. Both are to blame.

War and militarism are the only options the U.S. state has left to defend its corporate class interests and keep the people from rising up. The U.S.-armed Israel genocide in Palestine, the continued fueling of war in Ukraine and Eastern Europe, attempted interventions in Haiti, Bolivia, and many countries in Africa, an enormous expansion of overseas bases and military agreements in the Pacific, massive militarization at the U.S.-Mexico border and many more examples showcase how many lives the U.S. is willing to destroy in order to maintain its failing position as sole superpower.

Until we build a new system that truly belongs to the people, we will never have peace, justice or equity. We march against the 2024 Republican National Convention to expose its true

character, but we do so also to rally the people of the U.S. to fight for a true peoples' platform for genuine social change!

We must build a united anti-imperialist, anti-war movement that fights against wars of counter-revolution and aggression, struggles for a just peace based on social equity and economic justice, and defends the right to self-determination of all peoples by any means necessary!

We must shut down the imperialist war machine and all of its tentacles! We must end all U.S. aid and weapons sales to regimes that are using them to repress their people. We must act in solidarity with movements who are fighting against U.S. war, occupation, counterinsurgency, sanctions and intervention in their lands!

Hatem Abudayyeh, U.S. Palestinian Community Network (USPCN) National Chair
In December of 2022, the U.S. Palestinian Community Network (USPCN) learned that the RNC would be coming to Milwaukee, and so we immediately joined the Coalition to March on the RNC. Because Republicans have historically supported Israeli racism, white supremacy, apartheid, and Zionism, the systems of oppression used to colonize and occupy historical Palestine, we knew that we would have to stand with our social justice partners across the U.S. to fight for the rights of our Palestinian people and challenge Trump and all the other Republicans who, as of today, have provided political, diplomatic, and financial cover for Israel to kill almost 40,000 Palestinians in Gaza.

We also recognize that Israel's genocide against the Palestinian people of Gaza is the primary issue in the world today, our generation's Vietnam War; and just like that war, we have to play our part in the belly of the beast to stop the genocide, to end U.S. aid to Israel, and to stand with Palestine!

In the debate, we heard Trump say that Israel must be allowed "to finish the job." We know what that means, that Trump not only supports the genocide, he wants to intensify it, kill more and more Palestinians. But Trump in Milwaukee this week and Genocide Joe Biden in Chicago next month shouldn't forget that the vast majority of the world stands with Palestine and its right to self defense and resistance in Gaza, that the Palestinians and the Lebanese and the Yemenis and hundreds of millions of other Arabs in the region will continue to resist and ultimately defeat the U.S. and Israeli war machines, and that people in the U.S. want money for health care and childcare and jobs and immigration and education, not occupation.

USPCN's chapter in Milwaukee participated last month in the Juneteenth celebrations here, joining 200,000 people to commemorate and honor the rebellions of enslaved Black people who fought for and ultimately won their freedom. Today, along with the Black-led National Alliance Against Racist and Political Repression, dozens of other institutions, and thousands of other protesters, we will confront the evil policies of the Republican Party and continue to fight and march and struggle for freedom and justice – for the liberation of Black people and immigrants and women and workers and other oppressed communities in the U.S., and for Palestine's victory over Israel.

In conclusion: before South African apartheid was defeated, our international movement had built a consensus that South Africa had no right to exist as a racist, white supremacist, settler-colonialist, apartheid state. Today, there is the same worldwide consensus that Israel also has no right to exist as a racist, white supremacist, settler-colonialist, apartheid, zionist state. It is on its last legs, as is the U.S. empire.

And once we're done here this week in Milwaukee, we'll move south to Chicago and do the same with tens of thousands of protesters in August, telling Genocide Joe, Killer Kamala, Baneful Blinken, and their cabal of top Democrats that, "From the river to the sea, Palestine will be free!"

Omar Flores, Coalition to March on the RNC Co-Chair
Thank you to all the organizations and community members who are out today ready to join us in the culmination of two years of organizing. The Coalition to March on the RNC came together in the summer of 2022, and from the beginning our goal has been clear. In the first press release we ever put out announcing the Coalition's formation I was quoted: "We welcome the opportunity to rally the masses of people across the country in opposition to the Republicans and their racist, sexist, bigoted, anti-worker agenda." And this is still true. Two years later we have over one hundred and twenty organizations in the Coalition and five well defined points of unity: Defend women's, LGBTQ, and reproductive rights; Defend and expand immigrant rights; Peace, justice, and equity for all; Stand with Palestine; and to sum it all up: Fight the Racist and Reactionary Republican agenda!

The most visible figurehead of the Republican party right now is Donald Trump, but we want to be clear: we are marching on the Republicans' entire agenda. Our speakers today represent a broad movement against the entire Republican platform. We are marching on every Republican state slashing funding for DEI initiatives in education, every Republican governor putting up more razor wire to militarize the Southwest border, every Republican voting for right-to-work bills, and every Republican signing bombs they are sending to Gaza. We are here to march within sight and sound of the Fiserv Forum to let everybody know: our Coalition will fight the entire, racist, reactionary Republican agenda.

The organizations you will hear from today have been working on projects aligned with our Points of Unity for years, and there are dozens more in our Coalition that will not be speaking but have made incredible contributions to their respective movements. No one here pressed a button and made thousands of people appear in Red Arrow Park. And our work will not stop when we pack up this stage this afternoon. You can join many of the organizers here again in August in Chicago to March on the DNC where we will be letting the Democrats know that we also see every bomb they drop on Gaza, every family they separate at the border, and every time they choose not to raise the minimum wage. Beyond this summer, we encourage you to find a place in the movement by joining an organization. Listen to the speeches today, get on an email list or follow an organization on social media, and go to events. The work of fighting back the RNC might end soon, but the work of getting our demands met is just beginning. We look forward to a safe family friendly march today, and we look forward to every delegate and politician in the Fiserv hearing our message!
